

IAM

Efficient User Identity Management Through Centralized AAA Services

In today's fast-paced and competitive business landscape, effective Identity and Access Management (IAM) has become a core factor for modern businesses. In this digital era, where data breaches and cyber threats are on the rise, effectively managing and controlling digital user identities and user access to sensitive information is of paramount importance. IAM enables organizations to authenticate and authorize individuals within their network, ensuring that only authorized personnel can access specific resources and systems.

Single Sign-On

An authentication process in which a user is provided access to multiple applications/websites by using only a single set of login credentials such as username and password. Preventing user need to log in separately.

Multi-Factor Authentication

miniOrange boasts an industry leading list of 15+ MFA methods with high customizability and security. We also offer our miniOrange authenticator mobile application via Google play store and Apple app store.

Risk-Based Adaptive Authentication

With miniOrange, you can incorporate adaptive authentication policies that trigger in response to your employees' risk scores. We support restriction methods such as IP restriction, Location restriction, Device restriction, Time restriction.

User Lifecycle Management

miniOrange automates the process of creating, deleting, and managing user accounts across multiple applications and services, simplifying user management and sync across platforms and reducing the risk of errors or security vulnerabilities to your organization.

AD Sync & Self Service Password Management

Seamless integration with your AD/LDAP, enabling automated synchronization of user accounts, groups, attributes. Self service password management empowers your users to reset their AD passwords themselves, reducing the burden on IT help desk and increasing productivity.

Identity Federation

Federate your user identities to any trusted IDP for a seamless and secure user experience. We provide out of the box integration with various authentication directories like Active Directory, ADFS, LDAP or HRMS systems for authentication and provisioning.

Our customers love us, and here's proof !
